

# U3A Intermediate Bridge 2024-25

Week 6 Welcome

Steve Bailey

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

For each board played, {NS} is in competition with the other {NS}s playing the same board. Likewise {EW} is in competition with the other {EW}s.

Imagine a board played at 3 tables with results:

<i>NS</i>	<i>EW</i>	<i>Contract</i>	<i>NS#</i>	<i>EW#</i>	<i>Sometimes</i>
1	2	3NT+1 by {N}	430	-	<i>NS# is NS+#</i>
3	4	3NT= by {N}	400	-	<i>and</i>
5	6	3NT-1 by {N}	-	50	<i>EW# is NS-#.</i>

In the 5v6 case, {N} failed and so points are awarded to the defenders.

Separating {NS} & {EW} scoring, this could be (but isn't) written as:

<i>NS</i>	<i>EW</i>	<i>Contract</i>	<i>NS#</i>	<i>EW#</i>
1	2	3NT+1 by {N}	430	-430
3	4	3NT= by {N}	400	-400
5	6	3NT-1 by {N}	-50	50

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

So we have:

<i>NS</i>	<i>EW</i>	<i>Contract</i>	<i>NS#</i>	<i>EW#</i>
1	2	3NT+1 by {N}	430	-430
3	4	3NT= by {N}	400	-400
5	6	3NT-1 by {N}	-50	50

Looking at the {NS} scores, 1 has a better score than (has 'beaten') both 3 and 5. 3 has a better score than 5. While 5 did the worst, losing to everyone.

Looking at the {EW} scores, 6 beat 4 and 2, 4 beat 2 and 2 lost to all.

Pairs 1 and 6 have the best possible scores, they have beaten everyone that they played. They are awarded 100%.

Pairs 2 and 5 have the worst possible scores having lost to everyone they played. They are awarded 0%.

Pairs 3 & 4 beat one other pair and lost to one. They get 50%.

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

So we have:

<i>NS</i>	<i>EW</i>	<i>Contract</i>	<i>NS#</i>	<i>EW#</i>	<i>NS%</i>	<i>EW%</i>
1	2	3NT+1 by {N}	430	-430	100%	0%
3	4	3NT= by {N}	400	-400	50%	50%
5	6	3NT-1 by {N}	-50	50	0%	100%

You will note that in each row, the total percentage is 100%. That total could be 100+0, 50+50, 0+100 or even 13+87.

Also note that the two columns add up to the same total. In fact they add up to the number of tables that played the board times 50%. Here with 3 tables, both columns add up to  $3 * 50\% = 150\%$ .

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

So we have:

<i>NS</i>	<i>EW</i>	<i>Contract</i>	<i>NS#</i>	<i>EW#</i>	<i>NS%</i>	<i>EW%</i>
1	2	3NT+1 by {N}	430	-430	100%	0%
3	4	3NT= by {N}	400	-400	50%	50%
5	6	3NT-1 by {N}	-50	50	0%	100%

So all you have to do is calculate that percentage.

Percentage =  $100 * \text{number\_of\_pairs\_beaten} / (\text{number\_of\_tables} - 1)$

It is number of tables - 1 since you can't beat yourself. With 3 tables, the largest number of other pairs you can possibly beat is 2.

Thus Pair 3, who beat one pair ~ just pair 5, gets

$$100 * 1 / (3 - 1) = 100 / 2 = 50\%$$

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

So what do you do when several tables get the same score?

Treat is as half-beaten/half-lost.

For example:

<i>NS</i>	<i>EW</i>	<i>Contract</i>	<i>NS#</i>	<i>EW#</i>
1	2	4H+1 by {N}	650	-
3	4	4H+1 by {N}	650	-
5	6	4H= by {N}	620	-
7	8	4H= by {N}	620	-
9	10	4H= by {N}	620	-
11	12	4H-1 by {N}	-	100

1 beats 11,9,7,5 and  $\frac{1}{2}$  of 3 for  $4\frac{1}{2}$  out of 5 possible wins. 90%.

3 beats 11,9,7,5 and  $\frac{1}{2}$  of 1 for  $4\frac{1}{2}$  out of 5 possible wins. 90%.

5 beats 11 and  $\frac{1}{2}$  of 9,7 for 2 out of 5 = 40%. 7 & 9 also get 40%.

11 gets 0%.

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

<i>NS</i>	<i>EW</i>	<i>Contract</i>	<i>NS#</i>	<i>EW#</i>
1	2	4H+1 by {N}	650	-
3	4	4H+1 by {N}	650	-
5	6	4H= by {N}	620	-
7	8	4H= by {N}	620	-
9	10	4H= by {N}	620	-
11	12	4H-1 by {N}	-	100

1 beats 11,9,7,5 and ½ of 3 for 4½ out of 5 possible wins. 90%.

3 beats 11,9,7,5 and ½ of 1 for 4½ out of 5 possible wins. 90%.

5 beats 11 and ½ of 9,7 for 2 out of 5 = 40%. 7 & 9 also get 40%.

11 gets 0%.

Meanwhile 12 beats 10,8,6,4,2 for 5/5. 100%.

10, 8 & 6 all beat 4,2 and '½\_beat' two of the -620 scorers. 3/5 = 60%.

2 & 4 '½\_beat' the other -650 for ½ out of 5 = 10%.

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

<i>NS</i>	<i>EW</i>	<i>Contract</i>	<i>NS#</i>	<i>EW#</i>	<i>NS%</i>	<i>EW%</i>
1	2	4H+1 by {N}	650	-	90%	10%
3	4	4H+1 by {N}	650	-	90%	10%
5	6	4H= by {N}	620	-	40%	60%
7	8	4H= by {N}	620	-	40%	60%
9	10	4H= by {N}	620	-	40%	60%
11	12	4H-1 by {N}	-	100	0%	100%

Again each row totals 100%.

While each column totals 6 tables \* 50% = 300%.

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

You do that process for each board/traveller.

Then you average the scores for each pair.

Perhaps pair 13 got:

Bd1	100%
Bd2	20%
Bd3	50%
Bd4	75%

Average = Total / Number\_of\_boards = 245% / 4 = 61.25%.

And if that is the highest average of the day, they have won the event.

Note that it is the travellers that are scored, not the results that actually happened. In other words, if the traveller is filled in wrongly, this wrong information is what will determine your ranking at the event.

[See next slide.](#)

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

Note that it is the travellers that are scored, not the results that actually happened. In other words, if the traveller is filled in wrongly, this wrong information is what will determine your ranking at the event.

At today's tournament, there were three traveller's that were obviously wrongly filled in. One was easily corrected by the scorer, for the other two an interpretation was made by the scorer that may not reflect what happened at the table - [Fill the travellers in accurately.](#)

The resolvable traveller had the entry:

X        Y        2D=    W        AS        8        -        40

and while '2D=' is '8' tricks, it isn't a score of 40.

The scorer can look at this and choose the TWO results that agree (2D= and 8 tricks) and so change the 40 to 90, since

$$(2 * 20) + (\text{bonus\_of\_50}) = 90.$$

{N} didn't add the bonus and {E} didn't notice when [CHECKING.](#)

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

Note that it is the travellers that are scored, not the results that actually happened. In other words, if the traveller is filled in wrongly, this wrong information is what will determine your ranking at the event.

Fill the travellers in accurately.

The interpreted travellers had entries:

X	Y	2NT+1	S	?S	9	150	-
---	---	-------	---	----	---	-----	---

and

X	Y	1NT-2	E	6S	5	100	-
---	---	-------	---	----	---	-----	---

But the movement does not have {NS} X playing {EW} Y. Instead it has {NS} Y playing {EW} X.

One interpretation of this would be to assume that the pairs sat at the wrong seats at the right table and that no-one noticed. Thus they played the wrong hands.

Another interpretation is that the traveller was filled in wrongly.

# U3A Intermediate Bridge 2024-25

Week 6 This week

## Scoring a PAIRS tournament.

Note that it is the travellers that are scored, not the results that actually happened. In other words, if the traveller is filled in wrongly, this wrong information is what will determine your ranking at the event.

Fill the travellers in accurately.

There may be an official way to manage this problem, however I do not know it. I chose to interpret the travellers as:

Y	X	2NT+1	S	?S	9	150	-
---	---	-------	---	----	---	-----	---

and

Y	X	1NT-2	E	6S	5	100	-
---	---	-------	---	----	---	-----	---

The wrong pair may have received the 150/100.

But as has been said, it is the travellers that are scored, not the games played at the table.

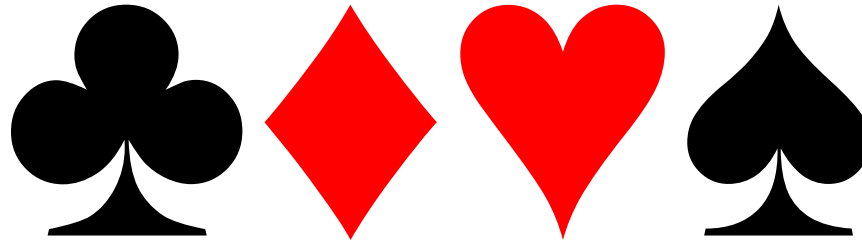

*Note also that despite requesting the opening lead card be recorded, only a suit was recorded several times. <Heavy sigh>*

# U3A Intermediate Bridge 2024-25

Week 6

The end

Week 6 tournament  
results follow.

# U3A Intermediate Bridge 2024-25

## Week 6 The Tournament

Tournament is a fancy way of writing "a normal session" at a Duplicate PAIRS bridge club. But we did have kids' party trophies as an award for first place!

### The pairs

#	N/E	S/W	Rank	%
7	PaG	VCW	(1)	63.3%
2	LBS	MK	(2)	54.2%
8	GL	AL	(3)	51.7%
5	AG	PN	(4)	50.9%
1	RF	SW	(5)	50.7%
4	AE	ST	(6)	46.7%
3	JR	CR	(7)	43.4%
6	DC	PeG	(8)	39.1%

### The event

5 rounds of 2 boards per round from 12 boards.

All 12 boards were shuffled and dealt by the players just before the session began.

Both {EW} and {NS} moved.

The results are sorted into %score order, not {NS} pair number order.

# U3A Intermediate Bridge 2024-25

## Week 6 The Tournament

### Deal abbreviations

Bd	Board	Number of the board.
Dlr	Dealer	(NESW).
Vul	Vulnerability	(None NS EW All).
NS EW	Pair numbers	
Dcl	Declarer	(NESW)
OL	Opening Lead	
Trk	Tricks	(0..13)
NS# EW#		Score for NS or EW
NS% EW%		Percentage of NS and EW

I do not believe that it is a universal requirement to add the result to the contract on a traveller. Many people just write 3NT and it is generally acceptable. However at U3AIB, the travellers are completed somewhat unreliably and I like to have 3 methods of determining the result: That way a "vote" for the method two agree on can be used.

3NT+1

10 tricks

430

all agree.

Please add the result to the contract "3NT+1" rather than just "3NT".

# U3A Intermediate Bridge 2024-25
